

The graph displays the relationship between Reverse Voltage (V) and the parameter 'both\_08161801D\_before2'. The x-axis represents Reverse Voltage (V) from -54.0 to -51.0, and the y-axis represents the parameter value from 0.0 to 1.0. The data points, connected by a dashed blue line, show a sharp increase in the parameter value as the reverse voltage increases from approximately -53.0 V to -51.5 V, eventually plateauing at 1.0.

Reverse Voltage (V)	both_08161801D_before2
-54.0	0.0
